CITY SCHOOL SYSTEMS, 1921-22

CONTENTS.—Comparative summary of statistics—Historical statistics—Administrative officers employed and expenditures for auxiliary agencies—Length of school term, number of teachers, enrollment, attendance, number of schools and school buildings—Kindergartens—Elementary and secondary schools—Junior high schools—Special schools for the deaf, blind, feeble-minded, etc.—Vocational and trade schools—Colleges and normal schools—Part-time and continuation schools—Evening schools—Summer schools—Receipts—Expenditures—Bonds, taxation, property values—Summary of personnel and attendance—Summary of expenditures and school property values.

INTRODUCTION

This report presents the statistics of public schools in cities for the school year 1921-22. The bureau has followed the classification based upon population as reported by the Bureau of the Census in 1920. Group I includes all cities having a population of 100,000 or more; Group II includes cities having a population of 30,000 or more, but fewer than 100,000; Group III includes cities having a population of 10,000 or more, but fewer than 30,000; Group IV includes cities with a population of 2,500 or more, but fewer than 10,000.

For all cities failing to report in 1922 on either personnel items, or financial items, or both, careful estimates have been made in compiling Table 1. Detailed statistics are given only for cities in Groups I, II, and III. Summary tables only are given by States for cities in Group IV.

TABLE 1.—*Comparative summary of school statistics for the three groups of cities of 10,000 population and more, 1921-22*

Items	Group I, cities of 100,000 population and more	Group II, cities of 30,000 to 100,000 population	Group III, cities of 10,000 to 30,000 population	Groups I, II, and III combined
I.—Distribution of attendance and personnel in day schools				
Kindergartens:				
City school systems reporting kindergartens.....	59	124	187	370
Supervisors.....	46	24	7	77
Teachers (women).....	5,955	1,866	1,132	8,953
Enrollment—				
Boys.....	159,829	41,501	23,468	224,798
Girls.....	159,507	41,875	23,486	224,868
Aggregate days' attendance.....	32,987,672	9,687,614	5,517,244	48,192,530

TABLE 1.—*Comparative summary of school statistics for the three groups of cities of 10,000 population and more, 1921-22—Continued*

Items	Group I, cities of 100,000 population and more	Group II, cities of 30,000 to 100,000 population	Group III, cities of 10,000 to 30,000 population	Groups I, II, and III combined
XII.— <i>Bonds and sinking funds (thousands of dollars)</i>				
School bonds outstanding.....	325,955	177,685	116,887	620,527
Other forms of debt.....	17,081	36,908	5,525	59,514
Total amount in sinking funds.....	38,238	11,168	23,689	73,095
XIII.— <i>Taxation and values</i>				
Assessed valuation of property (thousands of dollars).....	38,029,414	10,379,372	8,251,473	56,660,259
True valuation of property (thousands of dollars).....	45,234,444	13,609,988	12,060,365	70,904,807
Ratio of assessed valuation to true property value.....	84.07	76.26	68.42	79.91
Amount derived from tax on property (thousands of dollars).....	395,999	119,717	98,479	614,195
Average rate of taxation for all school purposes (mills).....	8.75	8.80	8.17	8.66
Value of school properties (thousands of dollars).....	899,280	391,315	344,964	1,635,559

HISTORICAL STATISTICS

* No attempt is made to show summaries of important items at different periods, because the list of cities in each group changes with each census report. Cities continue to grow and will therefore be found in one group for a 10-year period and in another group for the next 10-year period. Moreover, the grouping of cities according to size has changed at different times during the past 50 years, the first statistics of city school systems having been gathered by the bureau in 1872. Considering the rapid growth of the public high school, the movement of the rural population toward urban centers, and the ever-changing American idea of what constitutes a school, it would be a tedious and endless task to attempt to present comparable data in an historical table.

The following table presents some comparisons between certain items in 1920 and in 1922:

Pupils per teacher, cost of instruction, salary of teachers

Type of school	1920			1922		
	Average number of pupils per teacher	Average annual cost of instruction per pupil enrolled	Average annual salary of teachers	Average number of pupils per teacher	Average annual cost of instruction per pupil enrolled	Average annual salary of teachers
Kindergarten.....	49.6	\$23.69	\$1,092	50.2	\$32.82	\$1,524
Elementary, day.....	37.7	36.42	1,162	37.6	47.35	1,517
Normal and special.....	27.3	64.69	1,467	27.3	111.66	1,997
High school, day.....	24.6	76.12	1,620	26.3	82.34	1,882

There has been no particular change in the size of classes since 1920, excepting a small increase in high-school classes. The kindergarten teacher takes care of about 50 pupils, which would indicate that a great many of these teachers have one group of pupils for the forenoon session and another group for the afternoon session. The elementary grade teacher has about 38 pupils in her room. The normal-school teacher and special school teacher have about 27 pupils each, while the high-school teacher has 26.

The cost of instruction in kindergartens is lower for both years than that of any other class. The cost of instruction in high schools is higher in 1920 than for any other type of school, while in 1922 instructional cost in normal and special schools occupies the highest place. There has been an increase in the average salary of teachers since 1920, the marked increase being for kindergarten teachers. In 1920 it cost about $3\frac{1}{2}$ times as much per pupil for high-school instruction as it did for kindergarten instruction. In 1922 it cost about $2\frac{1}{2}$ times as much. This change is partly due to the fact that the average salary of kindergarten teachers has increased almost 50 per cent in this two-year period, while the average salary of high-school teachers has increased only about 25 per cent. Kindergarten instruction still continues to cost much less per pupil than does that of any other kind of instruction in the public schools. In computing the average annual cost of instruction of kindergarten pupils a portion of the costs of instructional supplies of elementary schools given in Table 1 is included on a basis of the number of pupils in kindergartens and in the elementary grades of city schools.

In the junior high school in 1922 there is one teacher to every 28.9 pupils, while in the regular high school there is one for every 25.8. In the junior high-school, instructional costs are \$64.63 per pupil, while they are \$86.88 for the regular high school. The junior high-school teacher receives \$1,638 as an average annual salary, while the regular high-school teacher receives \$1,938.

A further analysis of the normal, vocational, and special schools in 1922 shows the average number of pupils per teacher to be 18.8, 27.5, and 19.6, respectively. The averages of annual cost of instruction per pupil enrolled are \$160.05, \$98.09, and \$103.91, in the order named. The average salaries of teachers are \$2,534, \$2,056, and \$1,919, in the same order.

The night schools in 1920 had 35 pupils per teacher, the average cost for instruction for each pupil enrolled was \$8.50, and the average annual salary of a teacher was \$297. In 1922 these items have changed to 42.2 pupils, \$7.62, and \$316. These night sessions are generally short, and the night school runs for only a part of the year.

In the municipal colleges there are 21.4 students per teacher, the average cost of instruction per student enrolled is \$153.30, and the average salary of teachers \$2,957.

The 18,001 schools reported in cities of Groups I, II, and III in 1922 had 845 superintendents and assistant superintendents. For public day school work there were 3,276 supervisors and 8,003 principals. The total number of teachers was 195,209, and there were 6,947,521 pupils, with an average daily attendance of 5,440,991. The length of session has decreased from about 202 days in 1872 to 185 in 1922.
